

FRCR PART 1

North-West ANATOMY COURSE

Saturday 28th February & Sunday 1st March 2026

*****ONLINE*****

Supporting WORLDWIDE RADIOLOGY charity

This unique, very successful course aims to create a realistic exam scenario environment, covering all essential core areas of the syllabus to improve your knowledge and examination technique. You will have the opportunity to see hundreds of examples of typical anatomy and common variants that you are expected to have mastered by the time you attempt the Part 1 FRCR exam.

Highlights of the Course:

- A huge variety of anatomy questions will be covered over the two days.
- System based mocks (SBMs) with feedback from expert radiology consultants.
- SBMs topics include – GI, GU/Gynae, Paediatric, Chest, Cardiac, MSK, Neuro, Vascular/Intervention, Head & Neck anatomy.
- There will be 3 practice tests, developed by registrars' who have sat the exam, which will be followed by feedback.
- Discussion of hot topics, exam setting and previous questions.

Previous year feedback:

- "An excellent course. Good range of subspecialties. Lots of practice SBAs. Good speakers, all clearly very motivated and interested."
- "A lot of questions, was great revision, improved my confidence and cleared a lot of areas of confusion"
- "Lots of images covered and time given for feedback and questions"
- "I liked the mock exams - they put you to the test"

88% would recommend the course to others
